Erick Antonio Labrada Rodríguez

Backend & AI Software Engineer

Ciudad Obregón, Sonora, Mexico | erick.labrada233380@gmail.com | +52 668 116 3510
GitHub | LinkedIn | Portfolio

Technical Skills

Languages: Python, TypeScript, JavaScript, Go, SQL
Backend & data: Django, NestJS, REST APIs, PostgreSQL, MongoDB, Redis, RabbitMQ
AI & tooling: Large language models (LLMs), retrieval-augmented generation (RAG), Hugging Face, Docker, Git
Data processing: Pandas, NumPy, SQLAlchemy, Matplotlib

Experience

MEDIAÉREA Jul 2025 – Present
Full Stack Developer & AI Developer Ciudad Obregón, Mexico

- Maintained a distributed, multi-tenant ticketing platform and deployed a Django real-time dashboard. An internal before/after report recorded **34.47% lower average resolution time** and **35.80% lower average closure time** following deployment.
- The same report showed tickets resolved before the promised date rising from 8.41% to 18.35% (**+9.94 percentage points**) and before the deadline from 16.96% to 27.85% (+10.89 points).
- Contributed to a JavaScript-to-NestJS migration, translating undocumented business rules into backend workflows; built Python data pipelines with Pandas and SQLAlchemy for reporting and visualization.
- Contributed Python infrastructure, asynchronous LLM integration, request routing, bounded tool execution, and automated tests to **Sales Agent AI**.
- Built **OmniAerea**, an internal tool for AI-assisted developer workflows, with reported average savings of **15 minutes per task** and **one hour per peer review**.
- Developed e-commerce backend functionality for reporting, authentication, customer service chat, and data consistency across services. Participated as a developer in the company's CMMI Level 5 appraisal process.

Gila Software Feb 2025 – May 2025
AI Software Developer Intern Remote

- Contributed to the architecture and MVP of a multi-tenant AI communication assistant using Python and Hugging Face libraries.
- Orchestrated speech-to-text, text-to-speech, RAG, and intent-based request routing; developed query processing pipelines with semantic filter extraction and MongoDB. Implementation details are covered by an NDA.

Education

Instituto Tecnológico de Sonora Aug 2021 – May 2025
B.S. in Software Engineering

Languages: Spanish (native), English (fluent)
