

Erick Labrada

Software Engineer

Erick Antonio Labrada Rodríguez

Obregon, Sonora

+52 6681163510

ErickLabrada233380@gmail.com

Skills

- **Programming Languages:** Java, C#, JavaScript, TypeScript, HTML, CSS
 - **Databases:** SQL, MongoDB
 - **Frameworks & Tools:** NestJS, Angular, .net
 - **Languages:** English & Spanish
-

Experience

Personal Project/ 3D-Engine

July 2023 - Aug 2023, Obregon

Built a Java-based 3D engine as the foundation for future projects, enabling hardcoding of models and rotation visualizations. While developing the Engine I also documented the math concepts I learnt such as linear algebra, projection matrices, rotation matrices, and cross products.

Distributed Systems/ GreenHouse Manager

Oct 2024 - Dec 2024, Itson

Designed and implemented a greenhouse management system enabling owners to monitor sensors, configure safety thresholds, receive alerts and store/share the collected data through an API while integrating security measures, multiple communication protocols, and design patterns. To complement and test the project I also developed a greenhouse simulation using an ESP32.

Fundamentals Of AI/ Convolutional Neural Network

Dec 2024 - Itson

Developed a Convolutional Neural Network (CNN) capable of distinguishing between four Pokémon, including three with similar shapes and colors. Despite a small training dataset, the network achieved an F1 score of 0.6329, providing valuable insights into machine learning fundamentals.

Education

ITSON/ Bachelor's in Software Engineer

Aug 2021 - Present, Obregon, Sonora

Senior year, expected graduation: May 2025
